This thoroughly revised edition of Mooney, Knox, and Schacht's text uses a theoretically balanced, student-centered approach to provide a comprehensive exploration of social problems. The social problem in each chapter is framed in a global as well as a U.S. context. In addition, the three major theoretical perspectives are applied to the problem under discussion, and its consequences -- as well as alternative solutions -- are explored. The past ten years have seen an explosion of useful research surrounding human motivation and emotion; new insights allow researchers to answer the perennial questions, including "What do people want?" and "Why do they want what they want?" This book presents the work of a new generation of critical criminologists who explore the geographical, institutional, and political contexts of the discipline in Canada. By posing crucial questions and attempting to define what criminology should be, this book will shape debates about crime, policing, and punishment for years to come.

The essence of sociology lies in the sociological imagination. *Sociology in Action: A Canadian Perspective, Second Edition* articulates the importance of developing a sociological imagination and highlights the tools that are necessary to develop that skill: empirical research methods that create verifiable knowledge, sociological theories that explain that knowledge, and critical thinking that enables us to evaluate and to extrapolate from that knowledge. With their signature passion and clarity of style, Diane Symbaluk and Tami Bereska have created a text that will inspire 21st-century learners to become active and informed citizens.

Indigenous peoples are vastly overrepresented in the Canadian criminal justice system. The Canadian government has framed this disproportionate victimization and criminalization as being an "Indian problem." In *The Colonial Problem*, Lisa Monchalin challenges the myth of the "Indian problem" and encourages readers to view the crimes and injustices affecting Indigenous peoples from a more culturally aware position. She analyzes the consequences of assimilation policies, dishonoured treaty agreements, manipulative legislation, and systematic racism, arguing that the overrepresentation of Indigenous peoples in the Canadian criminal justice system is not an Indian problem but a colonial one.

Awarded second place in the 2017 AJN Book of the Year Awards in Psychiatric and Mental Health Nursing. "I welcome, at long last, a book on global mental health targeted to nurses, the front-line health worker for billions of people around the world. The roles that nurses can, and should, play in mental health care are diverse and this book addresses both well-trodden as well as emerging concerns across the continuum of care from promotion to prevention to treatment. Importantly, at the heart of this diversity is the foundation of compassion and care, the hallmark of the nursing profession." -- Vikram Patel, Professor of International Mental Health and Wellcome Trust Principal Research Fellow in Clinical Science, Centre for Global Mental Health, London School of Hygiene and Tropical Medicine, UK Psychiatric disorders have consistently been identified as serious and significant global burdens of disease, yet meeting the needs of people in mental distress has not often been a priority in health care. This important reference work sets out the knowledge base for understanding the state of mental health care globally, and translating that into effective practice. The Handbook provides a historical and contemporary context of mental health care, identifies and discusses evidence-based standards of care and strategies for mental health promotion and explores the need to deliver care from interdisciplinary and community-based models, placing these imperatives within a human rights and empowerment framework. It is made up of four core sections which look at: Key and emerging issues that affect global mental health practice and research, including the social context of health; Evidence-based health promotion strategies for major areas of practice internationally; A range of country studies, reflecting different problems and approaches to mental health and mental health care internationally; and What constitutes empowering practice. The only comprehensive work looking at global perspectives on mental health nursing, this is an invaluable reference for all students, academics and professionals involved in mental health research with an interest in global or cross-cultural issues.

Most youth who come in conflict with the law have experienced some form of trauma, yet many justice professionals are ill-equipped to deal with the effects trauma has on youth and instead reinforce a system that further traumatizes young offenders while ignoring the needs of victims. By taking a trauma-informed perspective, this text provides a much-needed alternative—one that allows for interventions based on principles of healing and restorative justice, rather than on punishment and risk assessment. In addition to providing a comprehensive historical overview of youth justice in Canada, Judah Oudshoorn addresses the context of youth offending by examining both individual trauma—including its emotional, cognitive, and behavioural effects—and collective trauma. The author tackles some of the most difficult problems facing youth justice today, especially the ongoing cycles of intergenerational trauma caused by the colonization of Indigenous peoples and patriarchal violence, and demonstrates how a trauma-informed approach to youth justice can work toward preventing crime and healing offenders, victims, and communities. Featuring a foreword written by Howard Zehr, case stories from the author's own work with victims and offenders, questions for reflection, and annotated lists of recommended readings, this engaging text is the perfect resource for college and university students in the field of youth justice.
