"Here's a delightful little book to warm the hearts of young children and teach them how to experience the joy of giving and receiving. Just think of all the little buckets this book will fill with love and encouragement." —Dr. Kevin Leman, author of *Have a New Kid by Friday* The day you were born was a very happy day. You are a special gift. Everyone was so happy to see you. But, there was one part of you that they could not see. It was your bucket, your invisible bucket. While using a simple metaphor of a bucket full of hearts and stars, authors Carol McCloud and Katherine Martin, M.A. illustrate, in the sweetest of ways, that we are all born with an invisible bucket and that our bucket holds all of our good thoughts and feelings. This book highlights the many ways that families and caregivers use to fill the buckets of children but also gives young children simple ideas on how to BE a bucket filler as well. This 24-page picture book is perfect for children, parents, grandparents, teachers and people that want to teach empathy, nurture kindness and create a positive environment in their home, classroom, workplace and community.

Sooner or later, almost all young children will bite someone—a friend, a parent, a sibling. This upbeat, colorful, virtually indestructible book helps prevent biting and teaches positive alternatives. The companion to our best-selling *Hands Are Not for Hitting* Board Book, *Teeth Are Not for Biting* gives reasons why children might want to bite. Little mouths feel sore when new teeth come in; sometimes kids bite when they're hungry, tired, cranky, frustrated, angry, bored, distressed, or seeking attention. Author Elizabeth Verdick suggests positive things children can do instead of biting: chew a chewy toy, drink a cold drink, get a hug, tell a grown-up. This book also includes helpful tips for parents and caregivers.

"This highly engaging landmark work, a natural history of exercise--by the author of the best seller *The Story of the Human Body*--seeks to answer a fundamental question: were you born to run or rest The first three parts of *Exercised* roughly follow the evolutionary story of human physical activity and inactivity, even as each chapter shatters a particular myth about exercise. Because we cannot understand physical activity without understanding its absence, Part One begins with physical inactivity. What are our bodies doing when we take it easy, including when we sit or sleep? Part Two explores physical activities that require speed, strength, and power, such as sprinting, lifting, and fighting. Part Three surveys physical activities that involve endurance, such as walking, running, or dancing, as well as their effect on aging. Part Four considers how anthropological and evolutionary approaches can help us exercise better in the modern world. How can we more effectively manage to exercise, and in what ways? To what extent, how, and why do different types and durations of exercise help prevent or treat the major diseases that are likely to make us sick and kill us?"--
