

## How To Build Tiger Avon Or Gta Sports Cars For Road Or Track

After 20 years of glorious 'failure', the best-loved team in Formula One is consigned to the history books, and it deserves one of its own. Minardi had a successful time in Formula Two until the tiny Italian outfit was ready to hit the big time in 1985. It somehow survived in F1's shark-infested waters as bigger teams (Lotus, Arrows, Tyrrell) were dragged under. They have a truly international fan-base and are the 'second team' of most F1 devotees. Minardi is held in such affection as everyone loves the plucky underdog – Minardi's annual budget would have lasted one month at the other Italian team up the road. Yet, from its plant in Faenza near Bologna, Minardi has produced cars that qualify, sometimes score points and often lead the way in their technology. Gian Carlo Minardi also developed a reputation as a fabulous talent-spotter – Fisichella, Trulli, Webber and the youngest ever World Champion Alonso all started their F1 careers with Minardi. For the last five years, Minardi was owned by controversial Australian tycoon Paul Stoddart. Cast as David against the Goliath of F1's governing body, Stoddart constantly hit the headlines as he tried to get a more equal share of the sport's billions. Ultimately, he failed and Red Bull has now bought the team. Despite a petition of 15,000 names, the Minardi name has vanished from the F1 grid and true motorheads miss it. This is the one and only inside account, with exclusive, comprehensive interviews with bosses, drivers and engineers. 140 unique photos complete this revalationary tale.

Farm model collecting has become increasingly popular with people of all ages. Britains, a leading manufacturer, have a long and distinctive history of producing these models. This book is the first comprehensive fully illustrated guide for those interested in collecting them. The book describes all the baler and combine models produced by Britains since they were first added to its farm model range 40 years ago, and also provides details of their development. As well as standard models, this includes details and photographs of prototype and rare models. The history is complemented by a catalog describing the main features, differences, issue dates and codes of each model produced. Each is illustrated with six color photographs showing the model from different angles and the issue packaging.

The interest and fascination these novel vehicles generate have made tiny cars and trucks significant collectibles over the past decade, and yet information on micro trucks has been almost non-existent. Old brochures printed by numerous micro car builders depict various truck versions: in the case of Iso, everything from hook (crane) and ladder to vans to pickups were featured, but few, if any, examples were thought to have been built beyond the prototype stage. Full colour photography, text and specs describe virtually unknown production micro trucks. Featured are rare Iso utility vehicles and Topolino Fiat vans, as well as more common production micro trucks from Autobianchi, Moto Guzzi, Vespa Ape, New Map Solyto and Diahatsu. 98 colour photos show many rare and extraordinary micro trucks.

This book covers the process of building 4-stroke engines to a professional standard, from selecting materials and planning work, right through to methods of final assembly and testing. It is written for the DIY engine builder in an easy-to-understand style, supported by approximately 200 photographs and original drawings. Containing five engine inspection and build sheets, and the contact details of approximately 45 specialist manufacturers and motorsport suppliers, it explains build methods common to all 4-stroke engines, rather than specific makes or models. An essential purchase for all engine-building enthusiasts.

The history of Dinky Toys, Corgi Toys and other makers of diecast metal cars has been covered in great detail in many books and magazine articles; by contrast, information on plastic toy cars is much harder to come by. Yet collectors are taking an increasing interest in plastic cars, particularly as the rise in the value of early diecast and tinplate models has put many of these out of reach of the average enthusiast. For the first time, this book aims to provide a systematic introduction to the vast number of plastic cars made during the 1950s and 1960s. Years of research have enabled the author to uncover many fascinating facts about the companies who made these toys. Some were major players in the toy industry, like Tri-ang and Brimtoy in the UK, Norev and Minialuxe in France, Gama and Siku in Germany and Ingap in Italy. Many others, though, were more obscure, and some only modeled one car before disappearing without trace. More than 250 photographs of these toys are included, with the emphasis being on the most colorful and realistic examples, all of them based on real vehicles of the period. In many cases, the toy is pictured alongside its original box, the presence of which can often double the value of the item to a collector. Readers will also find a handy glossary listing the names of many of the companies who were active in this field in the 1950s and 1960s, together with some evocative period advertisements and catalogue illustrations. If you thought that a model car had to be made of diecast metal to be worth collecting, this book might change your mind . . . With 250 color photos, extensive appendices and identification aids this is a must have for any collector or dealer.

Year-by-year evolution of the BSA Bantam, a simple commuter bike that thousands learnt to ride on. It became the standard GPO 'telegram bike' in the 1950s and was a huge success, with 100,000 built in the first four years of production. It's a story with interesting asides, like the Hummer, Harley-Davidson's version of the DKW that inspired the Bantam, and survived into the 1960s. But it's a sad story too – BSA failed to follow up the Bantam's early success by developing it, and by the mid-1960s it was looking outdated, especially next to the new breed of four-stroke Hondas. That the Bantam was allowed to fizzle out in 1971 symbolised the state of the industry that produced it, but today there's a thriving community of Bantam owner/riders. The book ends with a guide to buying a secondhand Bantam, along with useful appendices on specifications, engine/frame numbers, and contacts among the clubs and Bantam specialists. Every Bantam owner, or would be owner, needs this book - the Bantam Bible!

BSA Bantam is the most numerous and popular small classic British bike on the market. 100 photos illustrate this practical, straightforward guide to buying a secondhand BSA Bantam.
