This collection of Sonja Brentjes's articles deals with travels, encounters and the exchange of knowledge in the Mediterranean and Western Asia during the 16th and 17th centuries, focusing on three historiographical concerns. The first is how we should understand the relationship between Christian and Muslim societies, in the period between the translations from Arabic into Latin (10th - 13th centuries) and before the Napoleonic invasion of Ottoman Egypt (1798). The second concern is the "Western" discourse about the decline or even disappearance of the sciences in late medieval and early modern Islamic societies and, third, the construction of Western Asian natures and cultures in Catholic and Protestant books, maps and pictures. The articles discuss institutional and personal relationships, describe how Catholic or Protestant travellers learned about and accessed Muslim scholarly literature, and uncover contradictory modes of reporting, evaluating or eradicating the visited cultures and their knowledge.

This book addresses the multifaceted history of the domestic sphere in Europe from the Age of Reformation to the emergence of modern

society. By focusing on daily practice, interaction and social relations, it shows continuities and social change in European history from an interior perspective. The Routledge History of the Domestic Sphere in Europe contains a variety of approaches from different regions that each pose a challenge to commonplace views such as the emergence of confessional cultures, of private life, and of separate spheres of men and women. By analyzing a plethora of manifold sources including diaries, court records, paintings and domestic advice literature, this volume provides an overview of the domestic sphere as a location of work and consumption, conflict and cooperation, emotions and intimacy, and devotion and education. The book sheds light on changing relations between spouses, parents and children, masters and servants or apprentices, and humans and animals or plants, thereby exceeding the notion of the modern nuclear family. This volume will be of great use to upper-level graduates, postgraduates and experienced scholars interested in the history of family, household, social space, gender, emotions, material culture, work and private life in early modern and nineteenth-century Europe.
