The fast exchange of information and knowledge are the essential conditions for successful and effective research and practical applications in cartography. For successful research development, it is necessary to follow trends not only in this domain, but also try to adapt new trends and technologies from other areas. Trends in cartography are also quite often topics of many conferences which have the main aim to link research, education and application experts in cartography and GIS&T into one large platform. Such the right place for exchange and sharing of knowledge and skills was also the CARTOCON2014 conference, which took place in Olomouc, Czech Republic, in February 2014 and this book is a compilation of the best and most interesting contributions. The book content consists of four parts. The first part New approaches in map and atlas making collects studies about innovative ways in map production and atlases compilation. Following part of the book Progress in web cartography brings examples and tools for web map presentation. The third part Advanced methods in map use includes achievement of eye-tracking research and users' issues. The final part Cartography in practice and research is a clear evidence that cartography and maps played the significant role in many geosciences and in many branches of the society. Each individual paper is original and has its place in cartography.

Where end-users once queued up to ask the IT department for permission to buy a new computer or a new version of software, they are now bypassing IT altogether and buying it on their own. From laptops and smartphones to iPads and virtually unlimited software apps, end-users have tasted their freedom and love it. IT will simply never be the same. Bring Your Own Devices (BYOD) Survival Guide explains the psycho-techno phenomenon also known as bring your own technology (BYOT). Providing the guidance necessary for living in this new world, it describes the new end-users (Millennials) and their demands, as well as the strategic and tactical ramifications of these demands. Examining the business aspects of BYOD—selection, purchasing, and corporate culture—the book covers the broad range of technical considerations including selection, connectivity, training, support, and security. It also includes an extensive set of best practices. The book is geared for the small- to medium-size enterprise that needs to integrate BYOD into their environment. It addresses topics such as content and data management, risk assessment, performance measurement, management, and even configuration management. The text includes a set of Quick Start guides that provide tips for such things as assessing costs, cloud integration, and even legal issues. There is also a full set of appendices that supply helpful information on everything from security settings for Apple iOS devices to a sample employee mobile device agreement.

These Proceedings represent the work of contributors to the 14th European Conference on e-Learning, ECEL 2015, hosted this year by the University of Hertfordshire, Hatfield, UK on 29-30 October 2015. The Conference and Programme Co-Chairs are Professor Amanda Jefferies and Dr Marija Cubric, both from the University of Hertfordshire. The conference will be opened with a keynote address by Professor Patrick McAndrew, Director, Institute of Educational Technology, Open University, UK with a talk on "Innovating for learning: designing for the future of education." On the second day the keynote will be delivered by Professor John Traxler, University of Wolverhampton, UK on the subject of "Mobile Learning - No Longer Just e-Learning with Mobiles." ECEL provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in many different branches of e-Learning. At the same time, it provides an important opportunity for members of the EL community to come together with peers, share knowledge and exchange ideas. With an initial submission of 169 abstracts, after the double blind, peer review process there are 86 academic papers, 16 Phd Papers, 5 Work in Progress papers and 1 non academic papers in these Conference Proceedings. These papers reflect the truly global nature of research in the area with contributions from Algeria, Australia, Austria, Belgium, Botswana, Canada, Chile, Coventry, Czech Republic, Denmark, Egypt, England, Estonia, France, Germany, Ireland, Japan, Kazakhstan, New Zealand, Nigeria, Norway, Oman, Portugal, Republic of Kazakhstan, Romania, Saudi Arabia, Scotland, Singapore, South Africa, Sweden, the Czech Republic, Turkey, Uganda, UK, United Arab Emirates, UK and USA, Zimbabwe. A selection of papers - those agreed by a panel of reviewers and the editor will be published in a special conference edition of the EJEL (Electronic Journal of e-Learning www.ejel.org).

As technology evolves we are ever more reliant on the use of handheld and mobile devices, yet what do we know about their impact on learning? While there is a lot of interest in mobile technology, many schools still aren't sure how to best use it for learning and teaching. Learning with Handhelds and Mobiles explores this landscape and offers examples of how these technologies have been used for learning, how the problems that have arisen are being addressed, and offers ideas for the future. This invaluable book gives a voice to teachers and educators using mobiles and technology-enhanced learning in and out of schools, for regular school work and for innovative projects through exciting partnerships like Apps for Good. Learning with Handhelds and Mobiles shows the changes that are taking place within schools as a direct result of these emerging technologies, and contains case studies with accounts of best practice in a variety of settings including primary, secondary, and special schools, and learning beyond their boundaries. The book also explores themes of pedagogy, communication and affordances, collaborative learning, individual creativity and expression, self-directed and informal learning and outdoor education. The learning potential of handheld and mobile devices has excited teachers and educators, but until now there has been no structured, systematic overview available along with reflections on how this technology is changing educational practice. This book brings these together to provide a clearer picture of what is currently a fragmented area, and offers expert views of how we can understand these, and where it may take us next.

iCloud does a lot of amazing things: It keeps your mail, contacts, calendars, reminders, and notes in sync. It instantly (almost magically) copies that photo you took of your cousin on your iPhone to your Mac, iPad mini, and laptop. It lets you work with your Macs from afar. It helps you find stranded and wayward devices, and lets you know when your friends are nearby. And it does it all for free. iCloud encompasses so very many different features and fun bits that it's surprising to realize just how much you can do with a free account. Let Macworld's editors help you get the most out of it. This book collects all the material we've written in the last year on Apple's sync service, and we hope it will help you get to know iCloud and learn how best to use it in your life. This book focuses on OS X 10.8 (Mountain Lion), Windows 8, iOS 6, and iTunes 11 - but we still have some helpful hints for those users with older operating systems. We hope that you enjoy our Starter Guide, but, even more important, that you enjoy iCloud and find ways to incorporate it into your daily routine. If you want to learn more about your other iOS devices, make sure to check out our available Superguides including our iPhone 5 Superguide, iPad Mini Starter Guide, iPad Starter Guide, Fourth Edition (for Retina iPads; Apple's latest iPad, or third generation iPad users running iOS 6), iPhone 5 Starter Guide, iOS 6 Upgrade Guide, and Master iPhone Photography. Looking for Mac and OS X books? We also sell our Total Mountain Lion Superguide, Mac Basics, Mountain Lion, and Mac Gems, Mountain Lion edition.

Why does the announcement of a new cellphone model ignite excitement and passion? Why do most people return home when they forget their cellphones, while only few would return for their wallets? How did the cellphone technology become so dominant for many of us? This book offers an analysis of the historical evolution and of the meanings of this technology in the lives of billions of people. The book offers a unique point of view on the cellphone that merges genealogical analysis of its development since the 1990s and philosophical insights into a coherent analytical framework. With new concepts like "histories of the future" and "memory prosthesis," the book aims to explain the excitement arising from new model announcements and the ever-growing dependency on the cellphone through the framing of these experiences in wide philosophical contexts. It is the first philosophical analysis of the important roles the cellphone plays in contemporary everydayness.

Mobile Persuasion Design presents ten conceptual design projects (or 'Machines') for new mobile application's (smartphone or tablet with Web portals) that combine theories of persuasion and information design to change people's behaviour. Areas such as the environment, health, learning and happiness are explored, looking at ways of marrying people's wants and needs to make simple, usable and desirable mobile applications. A user-centred design approach has been used, adopting user experience (UX) methods, in-depth case studies and market analysis to see what a

modern user needs from their mobile application. By applying concepts like persuasion theory and information architecture, try to find ways to satisfy these needs and positively change their user habits. In 2011, the Green, Health, and Money Machines won design awards in an international competition hosted by the International Institute for Information Design, Vienna.

From the Forward by Michael Lesk: Google has now developed services far beyond text search. Google software will translate languages and support collaborative writing. The chapters in this book look at many Google services, from music to finance, and describe how they can be used by students and other library users. Going beyond information resources, there are now successful collaboration services available from Google and others. You can make conference calls with video and shared screens using Google Hangouts, Writing documents with small numbers of colleagues often involved delays while each author in sequence took over the writing and made edits. Today Google Docs enables multiple people to edit the same document at once. An ingenious use of color lets each participant watch in real time as the other participants edit, and keeps track of who is doing what. If the goal is to create a website rather than to write a report, Google Sites is now one of the most popular platforms. Google is also involved in social networking, with services such as Google+ Other tools view social developments over time and space. The Google Trends service, for example, will show you when and where people are searching for topics. Not surprisingly, searches for "swimwear" peak in June and searches for "snowmobile" peak in January. The Complete Guide to Using Google in Libraries, Volume 2: Research, User Applications, and Networking has 30 chapters divided into four parts: Research, User Applications, Networking, Searching. The contributors are practitioners who use the services they write about and they provide how-to advice that will help public, school, academic, and special librarians; library consultants, LIS faculty and students, and technology professionals.

In the tradition of WONDER and TO KILL A MOCKINGBIRD this award-winning New York Times bestseller is an intensely moving, lyrically-written novel. COUNTING BY 7S tells the story of Willow Chance, a twelve-year-old genius who is obsessed with diagnosing medical conditions and finds comfort in counting by 7s. It has never been easy for her to connect with anyone other than her adoptive parents, but that hasn't kept her from leading a quietly happy life . . . until now. Suddenly Willow's world is tragically changed when her parents both die in a car crash, leaving her alone in a baffling world. Her journey to find a fascinatingly diverse and fully believable surrogate family is a joy and a revelation to read.

Ever wonder what really happens that first year after you retire? I'm talking about the day-to-day emotions, feelings, projects, questions, anxieties... the ups and downs of this very important next step in one's life after some 25/30/35/40 years of formal work? Well, my "The Baby Boomers First-Hand/First-Year Guide to Retirement... 365 Days of Bliss (???!!) or Diss (Not???!!)" could provide some insight for those recently retired or contemplating retirement. This 365 day (from January 17, 2013 to January 17, 2014) daily journal allows the reader to follow along as I experience the chores, the life; the new budgeting, the wife — the questions, the emotions; some answers and hopefully some solutions. "First-Hand" is an easy-to-read/fast page turner; a humorous collection of thoughts and stuff... it does not hit you over the head with heavy retirement questions regarding pensions or 401(k) requirements; or statistics such as inflation projections, investment facts, tax shelters, financial formulas, etc... My book is simply a personal essay of my first 365 days of retirement, featuring real names and real people. Included are personal pictures and anecdotes of my 2013 journey that sheds light on the everyday minutia of retired life. I self-published my first book "SQUARE SQUIRE & THE JOURNEY TO DREAMSTATE" in 2012. I have a completed children's short story collection "LongTALES for shortTAILS" — currently being illustrated; and I have a young adult/short story collection "Word Food for Doods" ready for publishing. I am presently working on a novella about a jive/hipster dude cat called "Diddley Squatt."
