It covers the law, policy, science and philosophy at the heart of each element of the debate, discussing how it has developed, the current problems that beset it and what is necessary for the future. Together, all of the issues involved in whaling form a single crucible through which the future of conservation in international environmental law is being debated." "Students of law, politics, environmental economics and philosophy will find this book of great value for its cutting-edge relevance over the three disciplines. Policymakers will also find it of interest for the insight into one of the most controversial conservation debates of our time."--BOOK JACKET.

Oxford Handbooks of American Politics: George C. Edwards III.

This book examines how developing law and policies in England and Wales simultaneously promote and undermine children's rights.

This book critiques the dominant physical and biological interpretation of the Genocide Convention and argues that the idea of "culture" is central to properly understanding the crime of genocide. Using Raphael Lemkin's personal papers, archival materials from the State Department and the UN, as well as the mid-century secondary literature, it situates the convention in the longstanding debate between Enlightenment notions of universality and individualism, and Romantic notions of particularism and holism. The author conducts a thorough review of the treaty and its preparatory work to show that the drafters brought strong culturalist ideas to the debate and that Lemkin's ideas were held widely in the immediate postwar period. Reconstructing the mid-century conversation on genocide and situating it in the much broader mid-century discourse on justice and society he demonstrates that culture is not a distraction to be read out of the Genocide Convention; it is the very reason it exists. This volume poses a forceful challenge to the materialist interpretation and calls into question decades of international case law. It will be of interest to scholars of genocide, human rights, international law, the history of international law and human rights, and treaty interpretation.

The new edition revises and updates the work with developments in international criminal justice since 2014. It includes substantial new material on critical perspectives on international criminal justice, the fragmentation of international criminal law, new war crimes of prohibited means of warfare, and the prosecution of crimes committed in Syria and Northern Iraq. The book retains its highly-acclaimed systematic approach and consistent methodology, making it essential reading for both students and scholars of international criminal law, as well as practitioners and judges working in the field.
