Syrian political cartoons were for a long time a contradiction in terms, because freedom of expression in Syria has been controlled by the Ba'ath Party since the coup d'état in 1963. Nowadays it's a tragic reality that, after more than fifty years and after the uprising of 2011, for Syrian cartoonists freedom of expression is possible only in exile. Almost all cartoonists have had to flee Syria, like so many of their compatriots. Political and editorial cartoons offer a running critique or lampoon of governments or political movements, no matter what their intentions. However, they are dependent on freedom of expression or fighting for it. The Syrians have a difficult job under the dictatorial government of the Ba'ath Party and Bashar al-Assad. Before 2011 you could see glorifying portraits of Assad in cities, villages and the countryside throughout Syria. In government-controlled areas you will still see them, now more evident than even before. In this book you will find some cartoons with Assad, but also with other enemies of freedom of expression in Syria. Cartoons speak a universal language and for most cartoons a translation isn't necessary. You can laugh, cry or get mad about them at a glance. Though they may call for a little thought. Most cartoonists want to make you aware of the sad, crazy and cruel things that are happening in their country. Can one tiny girl change a very big school? The Oxford Encyclopedia of Islam and Politics provides in-depth coverage of the political dimensions of Islam and the Muslim world. Developments in Muslim societies in the nineteenth and twentieth centuries have highlighted the need for a major reference work focusing primarily on these dimensions. The realization of internal decay and relentless quest for reform, the collapse of the Islamic caliphate, the fall of most parts of the Muslim world under western colonialism, the emergence of nation-states, the dominance of secular ideologies, the rise of Islamic revivalist movements and faith-based political, economic, and social alternatives, the confrontation between Islamic movements and secular inspired regimes have constituted major turning points in the contemporary history of Muslim societies. At no time has the understanding of the nature and implications of these developments been needed more. Based on the highly acclaimed 2009 publication, The Oxford Encyclopedia of the Islamic World, The Oxford

The author of Emma's War offers a compelling account of the link between Muslim women's rights, Islamist opposition to the West, and the Global War on Terror, as explored through the experiences of two fascinating female champions from opposing sides of the conflict: Islam critic Ayaan Hirsi Ali and neuroscientist Aafia Siddiqui. With Emma's War: An Aid Worker, A Warlord, Radical Islam and the Politics of Oil, journalist Deborah Scroggins achieved major international acclaim; now, in Wanted Women, Scroggins again exposes a crucial untold story from the center of an ongoing ideological war—laying bare the sexual and cultural stereotypes embraced by both sides of a conflict that threatens to engulf the world.

Particle technology is a term used to refer to the science and technology related to the handling and processing of particles and powders. The production of particulate materials, with controlled properties tailored to subsequent processing and applications, is of major interest to a wide range of industries, including chemical and process, food, pharmaceuticals, minerals and metals companies and the handling of particles in gas and liquid solutions is a key technological step in chemical engineering. This textbook provides an excellent introduction to particle technology with worked examples and exercises. Based on feedback from students and practitioners worldwide, it has been newly edited and contains new chapters on slurry transport, colloids and fine particles, size enlargement and the health effects of fine powders. Topics covered include: Characterization (Size Analysis) Processing (Granulation, Fluidization) Particle Formation (Granulation, Size Reduction) Storage and Transport (Hopper Design,

It is also valuable supplementary reading for students in other branches of engineering, applied chemistry, physics, pharmaceuticals, mineral processing and metallurgy. Practitioners in industries in which powders are handled and processed may find it a useful starting point for gaining an understanding of the behavior of particles and powders. Review of the First Edition taken from High Temperatures - High pressures 1999 31 243 – 251 ".This is a modern textbook that presents clear-cut knowledge. It can be successfully used both for teaching particle technology at universities and for individual study of engineering problems in powder processing."

up the essence of their subjects clearly and wondrously. 50 b&w illustrations. Quiet Diplomacy in Action is the first comprehensive account of the work of Max van der Stoel as High Commissioner on National Minorities for the Organization for Security and Co-operation in Europe (OSCE). Because Van der Stoel worked discreetly, until now very little has been written about his activities. This book takes the reader behind the scenes to explain why the post of High Commissioner was created, what his mandate is, how he worked in practice, and what recurrent themes and issues he encountered. Quiet Diplomacy in Action also gives a detailed summary of the High Commissioner's activities in the more than fifteen countries that he was involved with between 1993 and 2001. Major documents relating to national minorities in the OSCE context are included in an annex. As Michael Ignatieff writes in the Foreword: 'Everyone talks about conflict prevention. One of the few senior figures that actually does it is the OSCE High Commissioner on National Minorities'. This book, written in cooperation with Mr. Van der Stoel, gives a unique insight into conflict prevention, minority rights, and the challenge of resolving inter-ethnic tensions. It should be considered a primary resource for all those interested in these subjects. Fridays of Rage reveals Al Jazeera's rise to that most respected of all Western media positions: the watchdog of democracy. Al Jazeera served as the nursery for the Arab world's democratic revolutions, promoting Friday as a "day of rage" and popular protest. This book provides a glimpse into how Al Jazeera strategically cast its journalists as

martyrs in the struggle for Arab freedom while promoting itself as the mouthpiece and advocate of the Arab public. In addition to heralding a new era of Arab democracy, Al Jazeera has become a major influence over Arab perceptions of American involvement in the Arab World, the Arab-Israeli conflict, the rise of global Islamic fundamentalism, and the expansion of the political far right. Al Jazeera's blueprint for "Muslim-democracy" was part of a vision announced by the network during its earliest broadcasts. The network embarked upon a mission to reconstruct the Arab mindset and psyche. Al Jazeera introduced exiled Islamist leaders to the larger Arab public while also providing Muslim feminists a platform. The inclusion and consideration of Westerners, Israelis, Hamas, secularists and others earned the network a reputation for pluralism and inclusiveness. Al Jazeera presented a mirror to an Arab world afraid to examine itself and its democratic deficiencies. But rather than assuming that Al Jazeera is a monolithic force for positive transformation in Arab society, *Fridays of Rage* examines the potentially dark implications of Al Jazeera's radical re-conceptualization of media as a strategic tool or weapon. As a powerful and rapidly evolving source of global influence, Al Jazeera embodies many paradoxes-the manifestations and effects of which we are likely only now becoming apparent. *Fridays of Rage* guides readers through this murky territory, where journalists are martyrs, words are weapons, and facts are bullets.

The logic of Manufacturing Resource Planning (MRP II) is implemented in most commercial production planning software tools and is commonly accepted by practitioners. However, these people are not satisfied with production planning and complain about long lead times, high work-in-process, and backlogging. As many researchers have pointed out, the reason for these shortcomings is inherent to the methods that are used. The research community is thus eager to find more sophisticated approaches. This book is an attempt to compile some state-of-the-art work in the field of production planning research. It includes material that somehow dominates the existing MRP II concept. 15 articles written by 36 authors from 10 countries cover many aspects related to MRP II. All papers went through a single-blind refereeing process before they were selected for being published in this book. When we received papers for this issue, we

discovered that MRP II is a topic about which not only management scientists show interest. As the list of authors proves, industrial engineers, computer scientists, and-operations researchers from academia as well as practitioners have contributed to this book. This, we hope, makes the book of value for a broad audience. We thank all authors who submitted papers. And, we are indebted to Dr. Werner Muller from Springer for his support in this book project. This book explicitly addresses ethical dilemmas and issues that post-secondary ESL faculty commonly encounter and examines them in the framework of social justice concerns. Ethics is defined broadly, to include responsibilities and obligations to students inside and outside the classroom, as well to colleagues, educational institutions, the TESL profession, and society as a whole. Scenarios in each chapter provide realistic and compelling situations for reflection and discussion. The authors then set out the issues raised, relate them to the classroom environment, and offer opportunities to examine them in a variety of contexts and to consider possible solutions to the dilemmas. Issues include testing, plagiarism, technology, social and political issues affecting students and the classroom, gift-giving, curriculum decisions, disruptive students, institutional constraints, academic freedom, gender, class, and power. Busy classroom instructors will find this book accessible, thought-provoking, and relevant to their

daily work situations. It is not intended as a theoretical treatment of ethics and social justice in ESL, nor does it propose that ESL faculty teach morals or ethics to students. Rather, it is designed as a concise, practical introduction to ethical practice for both new and experienced ESL faculty in post-secondary teaching situations in the United States, for others interested in the ESL classroom, and as a text for TESL classes and seminars. *Ethical Issues for ESL Faculty*: *maps new territory in the field--ethical issues in TESL, particularly as encountered by post-secondary classroom teachers, are not often discussed in ESL publications; *makes the complex issues of ethics in the context of social justice accessible to TESL practitioners; and *includes useful resources, such as additional scenarios for discussion, an extensive reference list, and selected ethics-related Web sites. *Migration on the Move* offers a critical review of the profound transformations that have taken place in the field of migration and asylum laws and policies in the past 20 years, and their implications for the refugee and migration issues faced by EU states.

This Open Access book offers a novel view on the benefits of a lasting variation between the member states in the EU. In order to bring together thirty very different European states and their citizens, the EU will have to offer more scope for variation. Unlike the existing differentiation by means of opt-outs and deviations, variation is not a concession intended to resolve impasses in negotiations; it is, rather, a different structuring principle. It takes differences in needs and in democratically supported convictions seriously. A common core remains necessary, specifically concerning the basic principles of democracy, rule of law, fundamental rights and freedoms, and the common market. By taking this approach, the authors remove the pressure to embrace uniformity from the debate about the EU's future. The book discusses forms of variation that fall both within and outside the current framework of European Union Treaties. The scope for these variations is mapped out in three domains: the internal market; the euro; and asylum, migration and border control.

Some years ago the Netherlands Research Committee for European Refugee Problems commissioned an investigation into the adjustment problems of foreigners who for various reasons have taken refuge in the Netherlands. This investigation is of great interest. In these times of rapid change we all have our problems of adjustment. How very much greater these problems must be for those who had to leave all they

cherished behind them and start all over again in new and strange surroundings. I wholeheartedly endorse the Committee's initiative in publishing in this monograph the main results of the investigation. These results should be useful in the work of the organizations concerned with refugee welfare. But in wider circles, both in the Netherlands and abroad, this publication should also awaken interest in the refugee question in general and the situation of refugees in the Netherlands in particular. How necessary this interest still is has been shown once again by the recent events in Hungary, which brought untold misery to many thousands. These Hungarian refugees and countless others who before them fled can best be helped to adjust to the new patterns of life if all who in their daily lives come into contact with them approach them in the right way. But to be able to do that we must first realize the difficulties the refugees have to contend with. Therefore the study of this monograph should be of positive value to many people.

Sam Cherribi is a Moroccan Muslim who became a naturalized Dutch citizen and member of the Dutch Parliament. In this book he draws on his personal experiences with European politics and media, extensive fieldwork in Dutch mosques, and interviews with imams. In recent years, the Netherlands has been swept by the same forces of change that have swept the rest of Europe: the consolidation of the European Union, a massive influx of Muslim immigrants and the rising voice of Islamic fundamentalism. Cherribi argues that this small country has amplified these forces, providing a useful lens through which to examine trends in all of Europe. The portents are troubling, he notes, as evidenced by the murders of journalist Pim Fortuyn and filmmaker Theo Van Gogh, after which riots broke out, mosques were burned, and Muslims were openly reviled by the public and the media. Cherribi himself was voted out of Parliament in the anti-migrant fervor that engulfed the Netherlands after these murders and, like many other Dutch Muslims, he emigrated to the United States. Looking back on these events, and bringing to bear his skills and training as a sociologist, Cherribi provides an invaluable account of one country's encounter with some of the most troubling trends of our times.
