Chemistry in Quantitative Language, second edition is an invaluable guide to solving chemical equations and calculations. It provides readers with intuitive and systematic strategies to carry out the many kinds of calculations they will meet in general chemistry.

Specifically designed to meet the needs of high school students, REA's High School Chemistry Tutor presents hundreds of solved problems with step-by-step and detailed solutions. Almost any imaginable problem that might be assigned for homework or given on an exam is covered. Included are thorough sections on thermodynamics, electrochemistry, organic chemistry, biochemistry, and nuclear chemistry. Fully indexed for locating specific problems rapidly.

Publishes in-depth articles on labor subjects, current labor statistics, information about current labor contracts, and book reviews.

The main objective of this text is to present a clear and comprehensive introduction to major topics in physics, chemistry, astronomy, geology, oceanography, and meteorology. The appealing full-color presentation includes numerous applications of current interest and emphasizes science as a human endeavor pivotal to modern society. In this fifth edition, many new or revised full-color illustrations and photographs enliven scientific concepts and capture student interest. "Scientific Enterprise" sections highlight the interconnection of different sciences, helping students view the sciences as related parts of a whole.

This workbook is a comprehensive collection of solved exercises and problems typical to AP, introductory, and general chemistry courses, as well as blank worksheets containing further practice problems and questions. It contains a total of 197 learning objectives, grouped in 28 lessons, and covering the vast majority of the types of problems that a student will encounter in a typical one-year chemistry course. It also contains a fully solved, 50-question practice test, which gives students a good idea of what they might expect on an actual final exam covering the entire material.
