

Summer Booster Ripasso E Recupero Della Lingua Inglese Con Cd 1

Cambridge IGCSE® and O Level History Second edition for Option B: the 20th Century of the syllabus (0470,2147), updated for the revised syllabus for first examination from 2020 and now supporting O Level as well. Help your students take an enquiry-led approach to historical learning with Cambridge IGCSE® and O Level History. Full of activities and primary and secondary sources, this resource encourages the application of historical skills and enables investigative questioning of cause and consequence. Endorsed by Cambridge Assessment International Education for Option B, the coursebook is written by a team of experienced teachers and provides comprehensive coverage of all of the Key Questions and four of the Depth Studies for syllabus Option B: the 20th Century. Sample answers to a selection of the exam-style questions can be found in the teacher's resource.

From the smallest gnat to the largest aircraft, all things that fly obey the same aerodynamic principles. The Simple Science of Flight offers a leisurely introduction to the mechanics of flight and, beyond that, to the scientific attitude that finds wonder in simple calculations, forging connections between, say, the energy efficiency of a peanut butter sandwich that fuels your body and that of the kerosene that fuels a jumbo jet. It is the product of a lifetime of watching and investigating the way flight happens. He covers paper airplanes, kites, gliders, and human-powered flying machines as well as birds and insects, explaining difficult concepts like lift, drag, wing loading, and cruising speed through many fascinating comparisons, anecdotes, and examples. Equations, often the best shorthand to explain and connect phenomena, are integrated seamlessly into the flow of the text in such a way that even math-phobic readers should not be put off. Tennekes begins with a simple comparison of the relative fuel consumption of hummingbirds, cars, and airplanes, then turns to the relations between an airplane's weight, its wing area, and its cruising speed. After showing that it is possible to collect data on all flying creatures and flying machines in a single "Great Flight Diagram", he looks at energetics through the considerable efforts of a little 35-gram bird in a wind tunnel. There are stories on the effects of headwinds, tailwinds, and weather conditions on both birds and planes, on the elegance of the mechanics that makes flight possible, and on the aerodynamics of sophisticated flying toys.

Despite the all-pervading influence of television ninety per cent of people in Britain still listen to the radio, clocking up over a billion hours of listening between us every week. It's a background to all our lives: we wake up to our clock radios, we have the radio on in the kitchen as we make the tea, it's on at our workplaces and in our cars. From Listen With Mother to the illicit thrill of tuning into pirate stations like Radio Caroline; from receiving a musical education from John Peel or having our imagination unlocked by Douglas Adams' The Hitchhiker's Guide to the Galaxy; from school-free summers played out against a soundtrack of Radio One and Test Match Special to more grown-up soundtracks of the Today programme on Radio 4 and the solemn, rhythmic intonation of the shipping forecast – in many ways, our lives can be measured in kilohertz. Yet radio is changing because the way we listen to the radio is changing. Last year the number of digital listeners at home exceeded the number of analogue listeners for the first time, meaning the pop and crackle and the age of stumbling upon something by chance is coming to an end. There will soon be no dial to turn, no in-between spaces on the waveband for washes of static, mysterious beeps and faint, distant voices. The mystery will be gone: we'll always know exactly what it is we're listening to, whether it's via scrolling LCD on our digital radios, the box at the bottom of our TV screen or because we've gone in search of a particular streaming station. And so, as the world of analogue listening fades, Charlie Connelly takes stock of the history of radio and its place in our lives as one of the very few genuinely shared national experiences. He explores its geniuses, crackpots and charlatans who got us to where we are today, and remembers its voices, personalities and programmes that helped to form who we are as individuals and as a nation. He visits the key radio locations from history, and looks at its vital role over the past century on both national and local levels. Part nostalgic eulogy, part social history, part travelogue, Last Train To Hilversum is Connelly's love letter to radio, exploring our relationship with the medium from its earliest days to the present in an attempt to recreate and revisit the world he entered on his childhood evenings on the dial as he set out on the radio journey of a lifetime.

'Speakout' is a 6-level general English course for adults developed in association with the BBC; bridging the gap between the classroom and the real world helping students express themselves in English. Have you ever wondered what jobs we will do in the future, or why some brands of shoes cost more than others? Explore these and many other questions as you begin your study of economics. Working in groups and on your own, you'll learn to make judgements and see how economics connects with your life. You can use this book alongside the coursebook for extra support or as perfect preparation before Cambridge IGCSE or O Level Economics. Answers are at the back of the book, giving teachers the option to set it as summer work before students start studying economics.

Unaware of his pirate ancestry and his clan's long-standing rivalry with the Hood family, accountant Morgan Cooke is shanghaied by his estranged father and placed at the forefront of the families' latest clash in the Caribbean, which is marked by the promise of a vast treasure. A first novel. 20,000 first printing.

Step-by-step grammar explanations with clear examples A wealth of varied practice exercises with write-in space on the page Tests to monitor students' progress Illustrated with lively cartoons to increase students' understanding An index and a comprehensive contents list for easy reference For self-study, homework or use in class.

Compact Preliminary for Schools is a focused, 50 - 60 hour course for Cambridge English: Preliminary for Schools, also known as Preliminary English Test (PET). The Student's Book features eight topic based units with focused exam preparation to maximise the performance of school-age learners. Units are divided in the order of the exam with pages on Reading, Writing, Listening and Speaking. A Grammar reference covers key areas in the syllabus and unit based wordlists include target vocabulary with definitions. The Student's Book also features a revision section and full practice test. The accompanying CD-ROM provides interactive grammar, vocabulary and exam skills tasks including listening. Course users also have exclusive access to a further practice test with audio via a URL in the Student's Book.

Children need to add lots of words to their spoken vocabulary and this fantastic look-and-talk book will provide them with plenty of opportunities to do so. Images borrowed from Usborne's 1,000 Things...series are collected here in a compact, simplified series for younger children. Thin board will withstand constant use.

Celebrated title story plus "Little Hut," "Mrs. Frola and Mr. Ponza, Her Son-in-Law," "Citrons from Sicily," "With Other Eyes," "A Voice," and 5 other tales from the 1934 Nobel Prize-winning author.

"An exploration of the questions and mysteries that have puzzled scholars and experts about the remote location of Easter Island, including its culture, giant statues, and writing. Features include a map, fact boxes, biographies of famous experts on Easter Island, places to see and visit, a glossary, further readings, and index"--

The more powerful the family...the darker the secrets. Meet the family everyone's talking about in this prequel novella to the Sicily's Corretti Dynasty series, brought to you by Harlequin Presents. Investigative journalist Emily Hyslop is furious when her editor—and ex—reassigns her from a career-making expos to a frivolous wedding in Sicily. But scandalous secrets lie behind the union of the rival Corretti and Battaglia families. Things start looking up when Emily meets the most intimidating, not to mention sexiest, man she's ever encountered.... Detective Anton Soranno has valuable insight into the Correttis and their scandalous dealings...and plenty of reason to hate them. He's the perfect source of information—and the more he helps Emily with her story, the more time they have to explore their intense desire. But even as their passionate nights uncover surprising feelings in both of them, Emily and Anton know that she must leave Sicily once the wedding is over.... Look for more books in the Sicily's Corretti Dynasty

series from Harlequin Presents, beginning with *A Legacy of Secrets* by Carol Marinelli.

Sixty years ago, four men parachuted onto a Norwegian glacier, carrying only the most basic equipment. Their mission was to prevent the Nazi regime from building an atomic bomb. Now wilderness expert Ray Mears tells the true story of this gruelling campaign, showing how these men's ability to survive in extreme conditions influenced the outcome of the Second World War. The Telemark campaign was an example of the bravery and skill of the SOE trainees. The Norwegians transformed a military disaster into a triumph. This book tells the full story for the first time.

From the USA Today bestselling author of *Midnight Captive*, the latest *Killer Instincts* novel is "off-the-charts-hot" romantic suspense that takes readers into the heart of an enigmatic mercenary... Out of all the stone-cold mercenaries in Jim Morgan's black ops organization, Derek "D" Pratt is the most intimidating. He is tight-lipped and covered in tattoos, and even the other guys on his team are afraid to ask him about his past. D's been off the grid for years, but after his teammate Sullivan is mistakenly captured in his place, D is forced to come out of hiding and face his demons. When D lands in Mexico, he's ready to risk everything to save his friend. To complicate matters, Sofia Amaro, a feisty doctor whom D had a one-night stand with months ago, has tracked him down. And in an instant she's unintentionally caught up in his life-threatening rescue mission. Now D must extract not one but two people from the most violent world he's ever encountered. And one of them is carrying his child...

Björn Kurtén's compelling novel gives the reader a detailed picture of life 35,000 years ago in Western Europe. One of the world's leading scholars of Ice Age fauna, Kurtén fuses extraordinary knowledge and imagination in this vivid evocation of our deepest past. This novel illuminates the lives of the humans who left us magnificent paintings in the caves of France and Spain.
