Every woman ought to be filled with shame at the thought that she is woman. -Clement of Alexandria, c. 150-215 The five worst infirmities that afflict the female are indocility, discontent, slander, jealousy, and silliness .... Such is the stupidity of woman's character, that it is incumbent upon her in every particular, to distrust herself and to obey her husband. -Confucian Marriage Manual Nature intended women to be our slaves. They are our property; we are not theirs. They belong to us, just as a tree that bears fruit belongs to a gardener. What a mad idea to demand equality for women.. . Women are nothing but machines for producing children. -Napoleon Bonaparte The fact of the matter is that the prime responsibility of a woman probably is to be on earth long enough to find the best mate possible for herself, and conceive children who will improve the species. -Norman Mailer Read these quotes and wonder!! Wonder at the strength, tenacity, and grace of females who have endured outrageous slings and arrows without becoming violent, uncaring, or incapacitated. Sturdy stuff is contained in our double X, preserved and nurtured for other, less distorted times. The Women in Context series is a reflection of the dawning light slowly illuminating woman as unique in some ways, but neither less than nor more than man. Surely, our imperfect world can well use all the talents and capabilities that men and women possess. This book provides insights into waste management practices in developing countries, and the application of research and innovation in finding appropriate solutions to improved waste management. The chapters have been selected with a focus on organic waste beneficiation, a significant waste stream in developing countries; the role of government and associated policy interventions; citizen behaviour in support of greater waste recycling; and the safe management of hazardous waste, particularly healthcare risk waste.

In this haunting work of journalistic investigation, Haruki Murakami tells the story of the horrific terrorist attack on Japanese soil that shook the entire world. On a clear spring day in 1995, five members of a religious cult unleashed poison gas on the Tokyo subway system. In attempt to discover why, Haruki Murakami talks to the people who lived through the catastrophe, and in so doing lays bare the Japanese psyche. As he discerns the fundamental issues that led to the attack, Murakami paints a clear vision of an event that could occur anytime, anywhere.
